EDUCATION

Associate's in Computer Science | GPA: 3.6
Borough of Manhattan Community College | Honors: Dean's List

Jan 2025 - Jan 2026
New York, NY

WORK EXPERIENCE

Private Tutor - Part Time
Genius Lab STEAM Center

June 2025 – June 2026
New York, NY

- Designed and delivered Python curriculum to 45+ students across 3 classes, building interactive coding projects that teach real-world problem-solving

Junior Software Engineer
THACO Group

Jan 2022 – Mar 2024
Yangon, Myanmar

- Contributed to hotel booking platform used by 15 hotels across 3 countries processing 1,200+ bookings/month; shipped frontend and backend features across Next.js/Typescript UI and Node.js services
- Built features for inventory and stock management system at Myanmar Plaza supporting real-time retail operations across multiple floors; collaborated with 4 engineering teams via GitHub pull request workflows

Software Engineering Intern | Full Stack
Auston College

May 2021 – Dec 2021
Yangon, Myanmar

- Selected for 8-month internship after winning Yangon city wide hackathon during high school
- Contributed full-stack features (booking, attendance tracking, CRM) to college management platform used daily by students and faculty; worked on a 7-person team under senior engineering management

PROJECTS

Thadar.com | Next.js, TypeScript, Postgres, Prisma, MinIO, Docker, Tailscale

May 2026

- Building an EdTech platform for lesson delivery, assignments, and student progress tracking; currently in active development at thadar.com
- Architected self-hosted infrastructure running Postgres, S3-compatible object storage (MinIO), and app services in Docker, with Tailscale mesh networking and Cloudflare Tunnel for zero-config HTTPS

mail.irrssue.com | Node.js, React, Go, Google OAuth2, Gmail API

Feb 2026

- Built full-stack Gmail client with OAuth2 auth, real-time message fetching, and thread/inbox management
- Designed minimal email interface prioritizing keyboard navigation and speed — github.com/irrssue/baremail

news.irrssue.com | Next.js, TypeScript, PM2, Cloudflare Tunnel

April 2026

- Built and self-hosted minimal Hacker News reader with Next.js SSR consuming HN Firebase API
- Diagnosed and resolved Cloudflare proxy hydration issue breaking JS chunk delivery in production

Self-Hosted Cloud Infrastructure | Ubuntu Server, Docker, Cloudflare, Tailscale

April 2026

- Architected personal cloud on bare-metal Ubuntu hosting 3 production services (Nextcloud, Immich, Jellyfin) with Cloudflare Tunnel for zero-trust HTTPS
- Built Tailscale mesh VPN across 3 devices for remote SSH access; deployed Docker stack on GPU-equipped hardware for local ML interface via Ollama — github.com/irrssue/homelab

TECHNICAL SKILLS

Languages | TypeScript, JavaScript, Python, SQL, HTML/CSS, Bash

Frameworks | React, Next.js, Node.js, Express, FastAPI, Tailwind CSS

Developer Tools | Claude Code, Git, GitHub (CI/CD), Docker, Cloudflare Tunnel, Tailscale, PM2, Vite, SSH, Linux

Libraries | SQLAlchemy, Prisma, Uvicorn, ApScheduler, httpx, MapLibre GL JS, Google API, Redis/Valkey, PostgreSQL
